

$\mathbf{Razorcaps}^{\mathsf{TM}}$ Instructions

W A R N I N G ! BLADES ARE EXTREMELY SHARP.

RAZORCAPS are the "world's only" true cut-on-contact three bladed broadhead with a replaceable blade-unit feature making them unlike anything on the market today.

We asked EXTREME BOWHUNTERS . . . "If they could make the perfect broadhead what qualities would it have?"

1.Real cut-on contact design

2.Razor-sharp Stainless Steel

3. Replaceable blade option

4. Re-sharpenable

5. Drastic angle of attack

6. Weight adaptable

This is not just another "snap-together" broadhead!! Our blade-units are made of knife-grade stainless steel, and a concentrated laser beam permanently bonds the stainless parts.

And, by simply changing the "ferrule" or "central shaft" of your RAZORCAPS, you can adapt the weight of your perfect broadhead to whatever hunting situation you encounter.

100, 125, 150, 175 or 200 Grains - You decide.
