

Blackjack™ Installation

***Block the Shock from your bow!
Get a Stabilizer and Shock Absorber all in one unit!***

This innovative stabilizer, with its energy fins, cuts bow recoil by up to 75% and reduces bow noise. You'll feel the difference!

Screw the stabilizer into your bow, quick-disconnect, or "knuckle" until the unit is hand tight.

DO NOT over-tighten or use a wrench!

This unit does not require any adjustments. ***Please DO NOT take this unit apart!*** The amount and type of granular fill has been carefully selected by the factory to insure the best performance. The end caps have been tightened to a torque setting that promotes the best vibration dampening and durability. Disassembly will degrade product performance.
